Lakewood Ranch, Florida • 34202 • USA

---

## Summary

*Savvy Software Developer with 10+ years in technical software development. Expert in a variety of platforms, languages and embedded systems.*

complex systems and identify opportunities for improvements and resolution of critical issues.

Have interest in designing and crafting efficient modern software, and learning new technologies and tools if need arises.

An excellent problem solver, able to quickly grasp

---

## Experience

### Ascom Wireless Solutions

FLORIDA, USA

#### Software Engineer

Feb '16 – Present

Research and development focusing on innovative and reliable technologies for call systems, medical device integration, and wireless telephony to support and optimize our customers' mission-critical processes.

- Embedded development using C/C++ and QT over Linux.
- Medical device communication through UDP and AMQP.
- Wrote features on all levels of the solution (OS, Data, Business Logic, UI)
- Taking care of big legacy code and trying to make it better.

**Skillset:** Operating Systems (mostly LINUX); QT; Data Structures; Algorithms; Performance design and analysis; AMQP; RabbitMQ; Networking; SQLite Databases.

**Languages:** Primarily C & C++ in a UNIX-like environment; Shell Scripting.

### Privicee

FLORIDA, USA

#### Software Developer

Aug '15 – Jan '16

Startup focusing on The Internet with the end user in mind. They are introducing disruptive business model into niche markets and building quality products that create elegant solutions for changing the way internet experiences are delivered.

- Wrote cross platform C daemon to manage all states of internet connection and VPN.
- Wrote both Unix/Linux and Mac clients that communicate with C daemon using IPC.
- Wrote a REST API to manage a VPN server remotely.
- Wrote REST APIs for murmur server, discourse and other third party solutions that we used.
- Wrote complete Dropbox clone backend.
- Resolved some scalability issues by using message queues.

**Skillset:** Operating Systems; Data Structures; Algorithms; Performance design and analysis; VPN Networks; Networking; NoSQL Databases (MongoDB); Redis.

**Languages:** Primarily C & C++ in a UNIX-like environment; Shell Scripting; Objective-C/Swift; JavaScript (Node.js).

### Innobis

SANTIAGO, CHILE

#### Lead Developer

Jan '15 – June '15

- Drafted and carried out the vision for my department: got everyone to look beyond PHP to other open source solutions such as Node.js & React.js/Flux.
- Wrote complete backend and frontend for a new project using sound new technologies with time constraints: Made the company meet their clients on time.

**Skillset:** Architecture & Design; Relational Databases (PostgreSQL); Server-side JavaScript (Node.js); Client-side JavaScript with React.js & Flux; HTML5; CSS.

**Languages:** Javascript; Shell Scripting; PL/pgSQL.

### Genera S.A.

SANTIAGO, CHILE

#### Lead Developer

Jan '14 – Jan '15

- Lead the Research & Development department reporting directly to the general director.
- Wrote biometric solutions using heavy C++ and QT that ran on ARM boards.

- Wrote code to interact with third party hardware: sensors, keypads, etc.
- Wrote C++ libraries that we were able to reuse on most of our projects.
- Reduced time on biometric fingerprint identification by writing more performant algorithms and data structures.

**Skillset:** Operating Systems; Data Structures; Algorithms; Performance design and analysis; Concurrency; Biometrics; Networking; QT; ARM; Embedded Linux.

**Languages:** Primarily C & C++ in a UNIX-like environment; Shell Scripting; SQL.

## Datys

HAVANA, CUBA

### Lead Developer

'09 – Jan '14

- Lead the development of a POS system for our clients.
- Contributed with other teams on different projects ranging from biometrics to internal tools development.
- Got involved with the software architecture, design and development of all technically challenging projects I could get my hands on.

**Skillset:** Operating Systems; Data Structures; Algorithms; Performance design and analysis; Biometrics; Networking.

**Languages:** Primarily C & C++; Pascal; C#; PHP; Shell Scripting; SQL & PL/SQL.

## CENATAV

HAVANA, CUBA

### Lead Developer & Researcher

'08 – '09

- Worked as a software developer on biometric solutions.
- Did a lot of research as a PhD student on biometrics and specially on indexing of large fingerprint databases.

**Skillset:** Operating Systems; Data Structures; Algorithms; Performance design and analysis; Biometrics; Networking.

**Languages:** Primarily C & C++; Shell Scripting; SQL.

*Please refer to my LinkedIn profile for a more complete list of work experiences along with recommendations.*

---

## Education

Instituto Superior Politécnico José Antonio Echeverría (CUJAE)

HAVANA, CUBA

### Bachelor degree in Computer Science (CS)

2003 – 2008

Main courses in Programming Languages, Algorithms, Data Structures, Software Design, Software Architecture, Systems Engineering, C/C++, Web Technologies. Picked up quite some PHP and Java skills along the way.

---

## Skills

**Technical expertise:** Big fan of Agile methodologies and continuous delivery and functional programming. Enjoys writing C/C++ mostly but has experience in other languages as well. Solid knowledge of SQL and relational databases (PostgreSQL, MySQL, SQLite). Solid knowledge of web technologies. Strong Linux administration skills (e.g. Bash scripting). Strong Embedded systems development and integration skills. Complex problem solver skills. Strong decision maker. Excellent communicator. Independent, organized, punctual, positive attitude, team player, fast learner. Happy Git user. Emacs and VIM user.

**Natural languages:** Spanish (*mother tongue*), English (*full professional proficiency*).

---

## Interests

**Non-exhaustive and in no apparent order:** Internet of Things, Game Development, C++ future, Rust, Lisp, Artificial Intelligence, Functional Programming, Concurrency, Parallelism, Algorithms, Coding, Readable Code, Problem Solving, Linux/Unix Kernel, Embedded Development, New Technologies, Frameworks and Libraries, Software Architecture, TDD, Design Patterns, Software Design, Cryptography, Open Source, Startups.
